1. ABSTRACT

Paycent is a global mobile dual e-wallet that can be funded by cryptocurrencies (e.g. Bitcoin, Ether, Litecoin) with high liquidity and fiat currencies within the same mobile application. This allows the cryptocurrencies holders multiple avenues of spend and straddle the world of fiat and cryptocurrencies. By having integrated fiat and crypto mobile wallets, plus the option of having a debit card linked to Paycent, this opens 200 countries and 36 million points that Paycent is accepted. The full ecosystem of Paycent and Paycent mPOS allows payments for daily household spend such as utilities, cable and Telco airtime. All conversions from cryptocurrencies to fiat will be done in realtime.

2. OUR USP’S AND COMPETITIVE ADVANTAGE IN THE MARKET

Paycent, a cryptowallet and an extension of our Paycent fiat wallet, will bridge the gap and create a complete fiat and cryptocurrency ecosystem. As Paycent is a live working product, we have an established network and a continuously expanding fiat ecosystem. We have secured regulatory licenses and are also currently in partnership talks with several governments, banks, and companies to create an even larger ecosystem for Paycent and Paycentos. We have already made successful strides in the application and we are fully committed in improving the wallet. The development on several aspects are as follows:

2.1 REGULATORY LICENSES

We have obtained regulatory licenses in UAE and the Philippines, and in-principle approval in Singapore and Hong Kong. With these licenses, we are able to start operations in the countries and build our user base.

2.2 BANKS

We are currently in tier 2 talks to acquire and merge two banks in the Philippines, to create a larger ecosystem for Paycent. Paycent will be functioning as the online channel for the merged bank, and provide microfinancing and basic banking services for the unbanked. This strategy will allow us to set up more branches across Asia and penetrate the mass market more quickly.

2.3 EXCHANGE

We are in negotiation talks to develop and host our exchange – Paycent Realtime Exchange, in Dubai, with the oversight of the Central Bank of UAE. This will provide realtime pricing and liquidity for Paycent and other cryptocurrencies. This will be a world first where a crypto-exchange is built on a regulated exchange.

2.4 PAYMENT INFRASTRUCTURE

We are in advanced talks with 2 major middle eastern economies to develop a Unified Digital Payments Network for their banking and government services, and with Paycent as the online hosts of their national payment infrastructure.
2.5 ESTABLISHED FIAT ECOSYSTEM

Over a thousand merchants and counting are now accepting Paycent as an online payment mode. This has been a team effort for the past year and our team is working continuously to expand this ecosystem.

2.6 CONFIRMED CRYPTO ECOSYSTEM

We have signed an agreement with For Est Real Estate (forest.ae) in UAE to be the first cryptowallet to utilize Paycentos as a payment token, and are also in talks with over 30 real estate developers to accept Paycent as a payment mode.

3. PAYCENT BACKGROUND

Paycent is a development by Texcent Asia Pte Ltd. Singapore has been chosen as our company headquarters. The rationale is that:

- Singapore has a thriving FinTech culture
- MAS (Monetary Authority of Singapore) is open to new FinTech ideas and incubation
- South Asia has a huge population with a high mobile penetration that is open to mobile money with about 625 million people unbanked

4. PROBLEM THAT WE ARE SOLVING

4.1 BRINGING CRYPTOCURRENCY TO THE MASSES

One of the primary goals of Texcent is to bring the cryptocurrency market/ecosystem to mainstream audiences. Such audiences might have very little experience with cryptocurrencies and will more likely have no easy access to use and invest in cryptocurrencies. Furthermore, there is the fear of new and innovative technologies that needs to be overcome. In the Paycent app, the user swipes right to the Paycent e-wallet, allowing the user to buy cryptocurrencies, spend cryptocurrencies and invest in cryptocurrencies with a simple and seamless interface. The benefit to the Blockchain/Cryptocurrency ecosystem will be a huge influx of fiat market capitalization into cryptocurrency which will enlarge the ecosystem. Holders of cryptocurrency will have a better acceptance as cryptocurrency become mainstream with seamless change through Paycent and its dual e-wallet.

4.2 ALLOWING CRYPTOCURRENCY USERS TO HAVE MULTIPLE AVENUES OF SPEND

One of the current limiting factors of cryptocurrencies is that, although the ecosystem is growing, there is a lack of avenues of spending it in everyday life. With the Paycent app, a user can pay for his utilities and make purchases with cryptocurrency within the dual e-wallet. Because of our seamless integration, we have increased the channels that cryptocurrency can be used. With the optional Paycent Debit card, cryptocurrency can also be used at 200 million points including ATM withdrawals.

4.3 CONVERSION OF CRYPTOCURRENCY TO FIAT AND VICE VERSA IN REALTIME

With the seamless integration between the dual e-wallets within Paycent, all cryptocurrency conversion to fiat will be done in realtime with a live exchange rate shown. This can eliminate fears and doubts of mainstream audiences to venture into cryptocurrency, because once cryptocurrency is converted, it will be reflected in their Paycent fiat e-wallet immediately.
4.4 CASHLESS FOR THE UNBANKED

With Paycent e-wallet app, the unbanked will have easy access to our merchant ecosystem and bill payments with a simple iOS or Android app. This inclusion allows the masses to participate in digital world with our network of clients and even a branded debit card that has over 200 million points including ATM withdrawals. With Paycent, we are helping to push the unbanked to the forefront of currency freedom with the ease of exchanging fiat money into cryptocurrency with a singular app and vise versa to spend it on daily essentials. The wallet allows financial inclusion to huge population that otherwise would be left behind in the push to a cashless society.

4.5 FINANCING FOR THE UNBANKED

Banks often do not offer non-collateralized loans unbanked individuals and new SME entrepreneurs. An alternative solution to this is microloans or microfinancing. Using a proprietary Paycent approach, we will assess individuals and provide loans to this group of people.

Using Big Data and through KYC processes, Paycent will gather demographic and financial information from the customers. Additionally, Paycent will build a digital identity of a user’s credit rating and worthiness score which will then be linked back to the user’s e-wallet profile. Some of the key scoring factors will include:

- Digital identity and reputation
- Social media history
- Repayment history
- Family identity verification

Initially, the loans offered to new users will be small, but as their reputation score improves, the amount limits will be raised. The social media and family identity will make up some of the big data that we will be collecting to verify the individuals.
5. THE GREAT TOKEN SALE

Implementing and integrating our crypto Paycent e-wallet with our live Paycent fiat e-wallet demands special resources. Bringing in the right set of personnel from Developers to Legal and developing the infrastructure will require additional funds. We are offering an Initial Token Sale of PYN tokens (Paycentos), instead of raising funds via the traditional method, to allow the community to participate in our success of straddling between the crypto and fiat world. The utility token can be used within the Paycent dual e-wallet whenever conversion is required from crypto to fiat.

5.1 WHAT IS THE OFFER

![Pie chart showing token distribution]

We will offer 60% of all PYN tokens created to the public for purchase on the 2nd November 2017 starting at 9am Singapore time till 30th November 2017. A further 19% of the PYN tokens created will be kept by Texcent as a reserve. Extra 1% bounty will be used for the bounty campaign. 10% of the tokens will be allocated for education and research for related blockchain technologies in all verticals, and a part of this will also go towards funding a Land Grant in Manila to construct the Asian Blockchain Institute of Technology (ABIT). ABIT’s vision is to bring together the brightest minds in the community to build on the project. The remaining 10% of the PYN tokens will be distributed to the founders, employees and early investors to secure long term interest and alignment within the company.

Besides building the Asian Blockchain Institute of Technology (ABIT), we will also be funding academic research and educational classes for aspiring developers, who will eventually make contributions and benefit the blockchain community. With a large blockchain community forming in the Philippines and the region, ABIT will also establish research cooperation with regional universities on various types and verticals of blockchain. Classes on blockchain and its derivatives will be held for all interested student and developers, and blockchain conferences will be organized to exchange ideas within the community and to bring awareness to the masses.
Each PYN token will be sold for 1:600 ETH (1 ETH will give your 600 PYN tokens). Other cryptocurrencies will be converted to ETH for the purchase. The minimum investment amount is 0.025 Ethereum.

We will accept a maximum of 450,000 ETH as our upper limit. If this amount is raise before the closing date of our TOKEN SALE, we will stop the sale. If the amount is less than the maximum, the ratios will apply to the amount raised.

### 5.2 THE REWARDS FOR PYN TOKEN HOLDERS

Holders of PYN tokens will receive 33% of the aggregate exchange rate revenue for cryptocurrencies to fiat and vice versa converted between the dual e-wallet of Paycent. This will initially be done quarterly with the bounty being paid in ETH to the PYN holders.

For the users of Paycent Debit Card, they will receive an addition 0.1% of each spend in PYN tokens as loyalties token-back (similar to cash backs from credit cards). This will create a secondary distribution of PYN tokens that will create an open market for PYN with a price support and price increase.

We will NOT create new PYN tokens after this TOKEN SALE, to support the growth of the PYN in the open market.

Holders of PYN tokens will receive 33% of the total interest revenue of micro loans to Paycent lenders. This will be done quarterly with the bounty being paid in ETH to the PYN holders.

```
PAYCENT → PAYCENT USER LOAN = 2% per month
          33% of total interest will be shared with PYN token holders

FIAT → CRYPTO-CURRENCY = 1.5% Transaction fee
                          33% of total interest will be shared with PYN token holders

CRYPTO-CURRENCY → FIAT = 1.5% Transaction fee
                        33% of total interest will be shared with PYN token holders
```
6. USE CASE SCENARIOS

Paycentos is the most convenient wallet up-to-date to buy/sell digital currency and spend it wherever you want with the Paycent card. It lets users to top up the wallet with local currency via cash, cards, banks transfer and then convert the fiat currency into equivalent Bitcoin or Ethereum in realtime.

1. Convert fiat currency to Bitcoin/Ethereum and vice versa in realtime

Tom received a couple of Bitcoins from a friend as a wedding present. He was sulking at what a wasted gift he got until now. With Paycent, he converted the Bitcoins into his local fiat currency in realtime basis.

2. Travel anywhere in the world without worrying about cash

With the Paycent card, you can pay at over 36 million merchants in around 200 countries without worrying about the local currency. Paycent e-wallet will convert your Bitcoin/Ether to the local currency when you swipe your card. Even more, you can use the card at ANY ATM to withdraw local currency funds paying the modest inter-currency exchange fee.

3. Split bills or pay your friends back

Say goodbye to debts. Paycent app allows you to split bills with your friends or pay them back instantly in digital or fiat currency instantly without any fees.
4. Filipino worker living in UAE

Jon lives in Dubai and his mother lives in the Philippines. Every month, Jon sends some of his savings to her. He used to go with the conventional funds transfer companies such as MoneyGram and Western Union. Tired of long queues and hefty convenience fees, he started to look for a reliable payment method which could do quick transfers with low fees.

He stumbled upon Paycent, signed his mother for the Paycent Debit Card. She uses the card to pay at over 100,000 merchants and Sari-Sari stores in the Philippines. Also, she withdraws cash when needed from any local ATM. Whenever the card is low on balance, Jon tops-up the card with fiat/digital currency.

Because the transfer happens on Blockchain, the transfer happens in realtime. Also, the transfer charges are bare minimum. Jon does not worry anymore and lives happily.

5. Removing entry barriers to Crypto

Jia lives in Vietnam. She works hard and wants to save money for her family. Due to frequent fluctuations in her national currency, she is always apprehensive of saving in Vietnamese Dong. The banks let her save in local currency only. She has been looking for reliable alternate solutions.

Jia was able to register for Paycent application and do the e-KYC in less than 5 minutes. Amazed by the possibilities of what the app can do for her apart from sending funds, she can store digital currencies in her Paycent wallet and convert back into fiat in realtime basis.

Though she has never heard of the blockchain technology, the Paycent app gives her a comfortable spot to use the technology. She feels that she has made a right choice.

A step into cryptocurrency for the general masses.
7. MILESTONES

7.1 Timeline

- **Q4 2016**: Development of Paycent app our Fiat wallet
- **Q2 2017**: Development work of Paycentos our crypto wallet
- **21st Aug 2017**: Launch of Paycent app in Play store and App store
- **30th Nov 2017**: Close of Token Sale
- **Q1 2017**: Application of money license for Singapore HK and PH
- **Q3 2017**: API development planning for Paycentos and Paycent with an abstraction layer
- **2nd Nov 2017**: Start of Token Sale
- **Q4 2017**: Launch of Paycentos
- **Q4 2017**: Partnership with Forest ae to use Paycentos as their sole payment channel for rentals
- **Q1 2018**: Launch of abstraction layer for Paycentos to local exchanges
- **Q2 2018**: Development of API integration with institutions, hotels and retail/ecommerce for Paycent mPOS
- **Q3 2018**: Developing a Unified Digital Payments network for banking & government services for Govt of 2 major middle eastern economies
- **Q4 2018**: Expansion in African Sub-continent and South and Central America
- **Q4 2017**: Expansion of Paycent to GCC Countries, and Tier 2 negotiations for acquiring two banks and merging them in Philippines
- **Q1 2018**: Launch of Paycent mPOS with dual fiat and cryptocurrencies, and Onboarding of over 30 Real Estate developers to use Paycentos as their payment channel for rentals
- **Q2 2018**: Working on Paycent Exchange in Dubai with Central Bank of UAE on remittance with Blockchain Technology
- **Q3 and Q4 2018**: Expansion into USA

7.2 Usage

```
100%

10% Acquiring Remittance and Wallet license and overall Banking License
35% User acquisition and marketing promotions
20% Country operations and salesforce
20% Merchant acquisition and strategic partnerships
15% Technical development and integration costs
```
• Acquiring Remittance and Wallet license, Overall Banking license and 2 banks in Philippines

45,000 ETH

This will allow Texcent to apply for a full banking license in the countries it is operating. Currently, Texcent is in the process of applying for Money Licenses in HK, SG and MY. A full banking license will give Texcent the ability to lower fees from interchange and transfer fees. Furthermore, Texcent will be in a better position to negotiate local card rewards and royalties for local users. In the Philippines, we are in tier 2 talks to acquire two banks and merge them, to allow Paycent to be their online presence, which can provide micro financing and basic banking to the unbanked. As US is a large potential market for Texcent, it will require a substantial working capital to acquire remittance and full banking licenses in all 50 states.

• User acquisition and marketing promotions

157,500 ETH

This will be used for marketing to the fiat world the benefits of cryptocurrencies and the ease that Paycentos allows a normal fiat user to enter into the cryptocurrency world and its ability to convert back to fiat or pay for everyday items in realtime. We will target GCC countries where there is a high proportion of wealth that is still in the fiat ecosystem for ease of use of having a “Dual” e-wallet.

• Country operations and salesforce

90,000 ETH

As Paycent straddles both the cryptocurrency and fiat world, offices are required and a salesforce for partnerships and merchant acquisition. This ensures that Paycent will have a thriving ecosystem of merchants and payment gateways for our users to pay with cryptocurrency or fiat. We are targeting 9 countries with each country using 10,000 ETHs for operation cost.

• Merchant acquisition and strategic partnerships

90,000 ETH

This will be used for strategic partnerships so that our Paycent users can have almost an immediate merchant ecosystem that allows both the use and exchange of cryptocurrencies in the domestic market. Furthermore our salesforce will source for local “mom and pop” shops to entice them to use our Paycent mPOS which accepts Paycentos cryptocurrencies and Paycent fiat currency. This will allow the Paycent user to have a market ecosystem in their neighborhood.
• Technical development and integration costs

67,500 ETH

Integration with Blockchain exchanges is highly technical and requires the resources of skilled engineers to build and execute. The initial resource-intensive project will be to build an abstraction layer that allows future exchanges to “plug and play” with our Paycent dual e-wallet framework. All other integration cost will be for our e-wallets to be integrated into “brick and mortar” institutions such as utility companies, cable, schools and local area governmental agencies. Retail and ecommerce sites will be integrated via regional/local aggregators.

8. PRODUCT INFORMATION

“At Texcent, we aim to be the global leader in complete mobile and cashless transactions”

8.1 WHAT IS PAYCENT

Paycent is a financial platform powered by Texcent, a Singapore-based company dedicated to deliver fully integrated mobile applications. Paycent aims to be the global leader for complete mobile and cashless transactions. Paycent runs on an entirely virtual channel and is comprised of two apps: one for users and one for merchants. We offer both users and merchants a secure and convenient digital payment platform so you can send and receive funds, shop and pay bills without using cash or credit cards.
8.2 WHAT IS PAYCENTOS

Paycentos is a cryptowallet that enables the user to exchange between fiat currencies and cryptocurrencies seamlessly. The Paycent e-wallet is the major gamechanger as it enables users to buy, store, transfer and pay using blockchain assets through their smartphone or a physical Paycent Debit card across 200 countries and 36 million merchants.

Paycent aims and seeks to offer its users access to a plethora of blockchain assets and fiat currencies with real-time accessibility and convenience, while adhering to the highest security standards in the industry.

Since the Paycent App is built on a decentralized platform, users and businesses can seamlessly exchange their assets from one another. This eradicates the risks and frauds observed with centralized solutions in the market currently.

The crypto asset to fiat conversion takes place automatically at the time of transaction. The Paycent App itself functions as an exchange where users can conveniently convert all types of blockchain assets into Paycentos tokens and vice versa without any service fee incurred. Users can choose among the different crypto assets for any particular transaction or purchase from the Paycent App.

Product Advantages

• Multi-asset (any blockchain asset compatible with and accepted by the Paycentos Wallet)
• Assets stay in cryptocurrency in Paycentos Wallet
• Best available foreign exchange and transaction fees
• Decentralized and trusted storage
• Global access to 36 million points of acceptance online and offline in close to 200 countries
• Rental payment in Paycentos for all Forest.ae rental properties

Users earn a 0.1% reward for every purchase transaction. This incentive will be transferred to the user in form of PYN tokens on a monthly basis, which additionally gives them the opportunity to become PYN token holders and further benefit from a potential value upside of the tokens (see the section below entitled “Paycent Initial Token Sale” for further details). Going forward, Paycent aims to distribute the reward in realtime.
8.3 WHAT IS PAYCENT MPOS

Paycent mPOS allows merchants to have the freedom of accepting cryptocurrencies from our users with Paycent crypto wallet or any other private crypto wallet. This gives merchants the option of keeping it in crypto or converting to fiat in realtime. The regular card MDR can be saved by the merchant if they transact within the crypto ecosystem, this is an added margin for merchants that want to go cashless but are constrained to low margins and high MDRs that card companies / banks are charging.

mPOS – Extended version:

In order to scale the acceptance of cryptocurrencies for all merchants in all categories. We are creating a Paycentos crypto gateway to function as a plug and play to their existing POS systems adding a benefit for merchants to collect payments for VISA, MC, AMEX, JCB, Union Pay and Cryptocurrencies. Tailored customization will be available for Corporates in the Retail, Hotel and Travel industries. The mPOS will be available on Web and Android/iOS. Merchants using our gateway/mPOS will be listed on our Category Merchant list on our Platform. Additionally, merchants can promote their products and services to thousands of cryptocurrency users across the globe.

Our in-house Exchange is a valuable element for offering competitive exchange rates to USD, EUR, GBP, SGD and more to our Paycent merchant platform. We offer the lowest rates available for FIAT currencies to cryptocurrencies. The input currency list in our system covers: EUR, USD, GBP, SGD, MYR, Won, and many to come.

Onboarding of Merchants take no longer than 24 hours. Technical bandwidth for merchants to integrate the gateway takes 1-2 hours and there’s total technical support provided during the development phase.

Benefits to Merchants are that they no longer incur hefty MDRs and have global visibility for their brands and promotions.
8.4 PAYCENT DEBIT CARD
Enabling cryptocurrencies to be spent anywhere and anytime

Paycent Card aims and seeks to offer its users access to a plethora of blockchain assets and fiat currencies with realtime accessibility and convenience, while adhering to the highest security standards in the industry.

Our user is issued a Paycent card (physically and virtually), a Debit Card which is also powered by a Paycent wallet (linked to the Card) simultaneously that could be loaded/topped-up using Credit, Debit cards and bank transfers. The wallet can be loaded using blockchain assets like BitCoin (BTC), Ethereum (ETH), Dash (DASH), ERC20 currently and other valuable digital assets. And in time, the Debit card would function as a Credit card (post owing a banking license).

Users unbanked or underbanked can use channels like kiosks and cash deposit machines to load their Paycent Wallet which can further be transferred to Paycent Wallet. Now the fiat is available to convert into a crypto asset. Crypto asset is then powered by a Debit card enabling the facility for Online and Offline

<table>

<tr>
<th>Paycentos (Crypto)</th>
<th>Paycent Debit Card</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.5 BTC 1.0 ETH 2.5 PYN</td>
<td>Physical or Virtual</td>
</tr>
</tbody>
</table>

Spending crypto in Fiat world

Paycent Card synergy and strategic partnerships with globally renowned card issuing and processing companies enable the facility for its users to transact and pay for any services across 200 countries and 36 million merchants (i.e., points of acceptance). Additionally, one could also withdraw cash from ATM terminals.

A Paycent user can use their BTC, ETH, DASH or ERC20 assets via the Paycent Debit Card (Paycentos Wallet) at offline and online channels, wherever the card is accepted.
Since the Paycent App is built on a decentralized platform, users and businesses can seamlessly exchange their assets from one another. This eradicates the risks and frauds observed with centralized solutions in the market currently.

The crypto asset to fiat conversion takes place automatically at the time of a transaction. Paycent wallet itself functions as an exchange where users can conveniently convert all types of blockchain assets into Paycentos tokens and vice versa without any service fee incurred. Users can choose among the different crypto assets for any particular transaction or purchase from Paycent Wallet. User gets a virtual Paycent debit card simultaneously generated and visible on Paycent App while the multi-cryptocurrency wallet is created. Physical card could be ordered from the App itself. User gets a virtual Paycent card simultaneously generated and visible on the App while the multi-cryptocurrency wallet is created. Physical card could be ordered as per requirement from the App itself.

Sending cryptocurrencies between Paycent App users is free and in realtime, with the currency being available in realtime for the recipient on their Paycent debit card.

The 1st 10,000 Paycent debit cards will be released in Asia Pacific, CIS, EU and the UK starting from the 10th of April 2018 – 30th of April 2018. These 1st 10,000 Paycent debit cards are classified into Solitaire, Sapphire, and Ruby cards. Paycent Solitaire and Sapphire debit cards will be issued free of charge to our early contributors who have contributed more than 500 ETH and 100 ETH, respectively. The Paycent Ruby cards will be charged with a nominal fee of USD15 per card.

**PAYCENT DEBIT CARDS**

**1. PAYCENT SOLITAIRE CARD**

This is a limited edition card for Paycentos (PYN) token holders who invest 500 ETH or more in the project. It comes with daily spending limit of US $100,000 and withdrawal limit of US $5,000 aside from the multiple additional rewards for the token holders. Card issuance and delivery fee are waived for Paycent Solitaire card holders.

**2. PAYCENT SAPPHIRE CARD**

This card is designed for PYN token holders who invest 100 ETH or more in the project. It comes with daily spending limit of US $50,000 and withdrawal limit of US $3,000. Card issuance and delivery fee are waived for Paycent Sapphire card holders.
3. PAYCENT RUBY CARD

This card can be generated through the app by the users as Paycent Ruby virtual card or they can order it. This will be the standard Paycent debit card that comes with a daily spending limit of US $5,000 and with a withdrawal limit of US $1,000.

8.5 PAYCENT REALTIME FRAMEWORK

Paycent Realtime Framework Layer will be the foundation of the Exchange that we will build in conjunction with Central Bank of UAE. With this exchange under the joint management of the Central Bank of UAE and Texcent, Paycentos will be needed to pay for services rendered by the Exchange. With Forest.ae and with the onboarding of the Real Estate ecosystem to accept Paycent as a default cryptocurrency, the demand and appreciation of Paycent is assured.
9. USER FLOW

9.1 User Flow of Fiat to Cryptocurrencies

User Flow of Fiat to Cryptocurrencies

9.2 User Flow of Cryptocurrencies to Fiat

User Flow of Cryptocurrencies to Fiat

9.3 Total Flow

Total Flow
10. BUYBACK AND REBATES PROGRAMME

10.1 With our mPOS MDR 1.1%

(a) Non Paycentos cryptocurrency

• 1% is paid to Paycent for operational charge.

• 0.1% is used to buyback Paycentos directly from the market quarterly and then will be immediately burned. This will be done for the 1st five years of the merchant using our mPOS, after that the merchant will be charged only 1% MDR and the merchant will not be part of our buyback programme. As we will be expanding our merchant ecosystem, we will have an ever-increasing number of merchants contributing to our buyback programme.

(b) Paycentos Cryptocurrency

• 0.1% is paid to Paycent for operational charge.

• 1% is given back to the user in the form of “token back” and is deposited into the Paycentos e-wallet quarterly. This is to encourage our Paycent e-wallet user to switch to Paycentos as a default cryptocurrency thereby increasing its demand.

10.2 With our mPOS MDR 1.5%

• 1% is paid to Paycent for operational charge.

• 0.5% is used to buyback Paycentos directly from the market quarterly and then will be immediately burned.

• With this buyback and burn with a finite supply of Paycentos, we are hoping to make Paycentos a compelling opportunity to hold with a diminishing supply and high potential for the price to rise.

• We have signed an agreement with Forest.ae to be their sole cryptocurrency e-wallet to collect rental fees in Paycentos from their rental property across GCC. We have negotiated a special MDR rate for the 1st five years.

He holds over 20 years of e-commerce experience in building websites in USA, Korea and China. He is also a Youtube influencer and an advisor to many successful blockchain projects.
IMPORTANT NOTICE (DISCLAIMER)

PLEASE READ THIS SECTION AND THE FOLLOWING SECTIONS ENTITLED “DISCLAIMER OF LIABILITY”, “NO REPRESENTATIONS AND WARRANTIES”, “REPRESENTATIONS AND WARRANTIES BY YOU”, “CAUTIONARY NOTE ON FORWARD-LOOKING STATEMENTS”, “MARKET AND INDUSTRY INFORMATION AND NO CONSENT OF OTHER PERSONS”, “NO ADVICE”, “NO FURTHER INFORMATION OR UPDATE”, “RESTRICTIONS ON DISTRIBUTION AND DISSEMINATION”, “NO OFFER OF SECURITIES OR REGISTRATION” AND “RISKS AND UNCERTAINTIES” CAREFULLY.

IF YOU ARE IN ANY DOUBT AS TO THE ACTION YOU SHOULD TAKE, YOU SHOULD CONSULT YOUR LEGAL, FINANCIAL, TAX OR OTHER PROFESSIONAL ADVISOR(S).

The PYN tokens are not intended to constitute securities in any jurisdiction. This Whitepaper does not constitute a prospectus or offer document of any sort and is not intended to constitute an offer of securities or a solicitation for investment in securities in any jurisdiction.

This Whitepaper does not constitute or form part of any opinion on any advice to sell, or any solicitation of any offer by the distributor/vendor of the PYN tokens (the “Distributor”) to purchase any PYN tokens nor shall it or any part of it nor the fact of its presentation form the basis of, or be relied upon in connection with, any contract or investment decision.

The Distributor will be an affiliate of Texcent Asia Pte. Ltd. (“Paycent”), and will deploy all proceeds of sale of the PYN tokens to fund Paycent’s project, businesses and operations.

No person is bound to enter into any contract or binding legal commitment in relation to the sale and purchase of the PYN tokens and no cryptocurrency or other form of payment is to be accepted on the basis of this Whitepaper.

Any agreement as between the Distributor and you as a purchaser, and in relation to any sale and purchase, of PYN tokens (as referred to in this Whitepaper) is to be governed by only a separate document setting out the terms and conditions (the “TandCs”) of such agreement. In the event of any inconsistencies between the TandCs and this Whitepaper, the former shall prevail.

No regulatory authority has examined or approved of any of the information set out in this Whitepaper. No such action has been or will be taken under the laws, regulatory requirements or rules of any jurisdiction. The publication, distribution or dissemination of this Whitepaper does not imply that the applicable laws, regulatory requirements or rules have been complied with.

There are risks and uncertainties associated with Paycent and/or the Distributor and their respective businesses and operations, the PYN tokens, the Paycent Initial Token Sale and the Paycent and Paycentos Wallet. (each as referred to in this Whitepaper).
No part of this Whitepaper is to be reproduced, distributed or disseminated without including this section and the following sections entitled “Disclaimer of Liability”, “No Representations and Warranties”, “Representations and Warranties By You”, “Cautionary Note On Forward-Looking Statements”, “Market and Industry Information and No Consent of Other Persons”, “Terms Used”, “No Advice”, “No Further Information or Update”, “Restrictions On Distribution and Dissemination”, “No Offer of Securities Or Registration” and “Risks and Uncertainties”.

**DISCLAIMER OF LIABILITY**

To the maximum extent permitted by the applicable laws, regulations and rules, Paycent and/or the Distributor shall not be liable for any indirect, special, incidental, consequential or other losses of any kind, in tort, contract or otherwise (including but not limited to loss of revenue, income or profits, and loss of use or data), arising out of or in connection with any acceptance of or reliance on this Whitepaper or any part thereof by you.

**NO REPRESENTATIONS AND WARRANTIES**

Paycent and/or the Distributor does not make or purport to make, and hereby disclaims, any representation, warranty or undertaking in any form whatsoever to any entity or person, including any representation, warranty or undertaking in relation to the truth, accuracy and completeness of any of the information set out in this Whitepaper.

**REPRESENTATIONS AND WARRANTIES**

By accessing and/or accepting possession of any information in this Whitepaper or such part thereof (as the case may be), you represent and warrant to Paycent and/or the Distributor as follows:

(a) you agree and acknowledge that the PYN tokens do not constitute securities in any form in any jurisdiction;

(b) you agree and acknowledge that this Whitepaper does not constitute a prospectus or offer document of any sort and is not intended to constitute an offer of securities in any jurisdiction or a solicitation for investment in securities and you are not bound to enter into any contract or binding legal commitment and no cryptocurrency or other form of payment is to be accepted on the basis of this Whitepaper;

(c) you agree and acknowledge that no regulatory authority has examined or approved of the information set out in this Whitepaper, no action has been or will be taken under the laws, regulatory requirements or rules of any jurisdiction and the publication, distribution or dissemination of this Whitepaper to you does not imply that the applicable laws, regulatory requirements or rules have been complied with;

(d) you agree and acknowledge that this Whitepaper, the undertaking and/or the completion of the Paycent Initial Token Sale, or future trading of the PYN tokens on any cryptocurrency exchange, shall not be construed, interpreted or deemed by you as an indication of the merits of the Paycent and/or the Distributor, the PYN tokens, the Paycent Initial Token Sale and the Paycent and Paycentos Wallet (each as referred to in this Whitepaper);
(e) the distribution or dissemination of this Whitepaper, any part thereof or any copy thereof, or acceptance of the same by you, is not prohibited or restricted by the applicable laws, regulations or rules in your jurisdiction, and where any restrictions in relation to possession are applicable, you have observed and complied with all such restrictions at your own expense and without liability to Paycent and/or the Distributor;

(f) you agree and acknowledge that in the case where you wish to purchase any PYN tokens, the PYN tokens are not to be construed, interpreted, classified or treated as:

   (i) any kind of currency other than cryptocurrency;

   (ii) debentures, stocks or shares issued by any person or entity (whether Paycent and/or the Distributor)

   (i) rights, options or derivatives in respect of such debentures, stocks or shares;

   (ii) rights under a contract for differences or under any other contract the purpose or pretended purpose of which is to secure a profit or avoid a loss;

   (iii) units in a collective investment scheme;

   (iv) units in a business trust;

   (v) derivatives of units in a business trust; or

   (vi) any other security or class of securities.

(g) you are fully aware of and understand that you are not eligible to purchase any PYN tokens if you are a citizen, resident (tax or otherwise) or green card holder of the United States of America or a citizen or resident of the Republic of Singapore;

(h) you have a basic degree of understanding of the operation, functionality, usage, storage, transmission mechanisms and other material characteristics of cryptocurrencies, blockchain-based software systems, cryptocurrency wallets or other related token storage mechanisms, blockchain technology and smart contract technology;

(i) you are fully aware and understand that in the case where you wish to purchase any PYN tokens, there are risks associated with Paycent and the Distributor and their respective business and operations, the PYN tokens, the Paycent Initial Token Sale and the Paycent and Paycentos Wallet (each as referred to in the Whitepaper);

(j) you agree and acknowledge that neither Paycent nor the Distributor is liable for any indirect, special, incidental, consequential or other losses of any kind, in tort, contract or otherwise (including but not limited to loss of revenue, income or profits, and loss of use or data), arising out of or in connection with any acceptance of or reliance on this Whitepaper or any part thereof by you; and
(k) all of the above representations and warranties are true, complete, accurate and non-misleading from the time of your access to and/or acceptance of possession this Whitepaper or such part thereof (as the case may be).

**CAUTIONARY NOTE ON FORWARD-LOOKING STATEMENTS**

All statements contained in this Whitepaper, statements made in press releases or in any place accessible by the public and oral statements that may be made by Paycent and/or the Distributor or their respective directors, executive officers or employees acting on behalf of Paycent or the Distributor (as the case may be), that are not statements of historical fact, constitute “forward-looking statements”. Some of these statements can be identified by forward-looking terms such as “aim”, “target”, “anticipate”, “believe”, “could”, “estimate”, “expect”, “if”, “intend”, “may”, “plan”, “possible”, “probable”, “project”, “should”, “would”, “will” or other similar terms. However, these terms are not the exclusive means of identifying forward-looking statements. All statements regarding Paycent’s and/or the Distributor’s financial position, business strategies, plans and prospects and the prospects of the industry which Paycent and/or the Distributor is in are forward-looking statements. These forward-looking statements, including but not limited to statements as to Paycent’s and/or the Distributor’s revenue and profitability, prospects, future plans, other expected industry trends and other matters discussed in this Whitepaper regarding Paycent and/or the Distributor are matters that are not historic facts, but only predictions.

These forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual future results, performance or achievements of Paycent and/or the Distributor to be materially different from any future results, performance or achievements expected, expressed or implied by such forward-looking statements. These factors include, amongst others:

(a) changes in political, social, economic and stock or cryptocurrency market conditions, and the regulatory environment in the countries in which Paycent and/or the Distributor conducts its respective businesses and operations;

(b) the risk that Paycent and/or the Distributor may be unable or execute or implement their respective business strategies and future plans;

(c) changes in interest rates and exchange rates of fiat currencies and cryptocurrencies;

(d) changes in the anticipated growth strategies and expected internal growth of Paycent and/or the Distributor;

(e) changes in the availability and fees payable to Paycent and/or the Distributor in connection with their respective businesses and operations;

(f) changes in the availability and salaries of employees who are required by Paycent and/or the Distributor to operate their respective businesses and operations;
(g) changes in preferences of customers of Paycent and/or the Distributor;

(h) changes in competitive conditions under which Paycent and/or the Distributor operate, and the ability of Paycent and/or the Distributor to compete under such conditions;

(i) changes in the future capital needs of Paycent and/or the Distributor and the availability of financing and capital to fund such needs;

(j) war or acts of international or domestic terrorism;

(k) occurrences of catastrophic events, natural disasters and acts of God that affect the businesses and/or operations of Paycent and/or the Distributor;

(l) other factors beyond the control of Paycent and/or the Distributor; and

(m) any risk and uncertainties associated with Paycent and/or the Distributor and their businesses and operations, the PYN tokens, the Paycent Initial Token Sale and the Paycent and Paycentos Wallet (each as referred to in the Whitepaper).

All forward-looking statements made by or attributable to Paycent and/or the Distributor or persons acting on behalf of Paycent and/or the Distributor are expressly qualified in their entirety by such factors. Given that risks and uncertainties that may cause the actual future results, performance or achievements of Paycent and/or the Distributor to be materially different from that expected, expressed or implied by the forward-looking statements in this Whitepaper, undue reliance must not be placed on these statements. These forward-looking statements are applicable only as of the date of this Whitepaper.

Neither Paycent, the Distributor nor any other person represents, warrants and/or undertakes that the actual future results, performance or achievements of Paycent and/or the Distributor will be as discussed in those forward-looking statements. The actual results, performance or achievements of Paycent and/or the Distributor may differ materially from those anticipated in these forward-looking statements.

Nothing contained in this Whitepaper is or may be relied upon as a promise, representation or undertaking as to the future performance or policies of Paycent and/or the Distributor. Further, Paycent and/or the Distributor disclaim any responsibility to update any of those forward-looking statements or publicly announce any revisions to those forward-looking statements to reflect future developments, events or circumstances, even if new information becomes available or other events occur in the future.

MARKET AND INDUSTRY INFORMATION AND NO CONSENT OF OTHER PERSONS

This Whitepaper includes market and industry information and forecasts that have been obtained from internal surveys, reports and studies, where appropriate, as well as market research, publicly available information and industry publications. Such surveys, reports, studies, market research, publicly available information and publications generally state that the information that they contain has been obtained from sources believed to be reliable, but there can be no assurance as to the accuracy or completeness of such included information.
Save for Paycent, the Distributor and their respective directors, executive officers and employees, no person has provided his or her consent to the inclusion of his or her name and/or other information attributed or perceived to be attributed to such person in connection therewith in this Whitepaper and no representation, warranty or undertaking is or purported to be provided as to the accuracy or completeness of such information by such person and such persons shall not be obliged to provide any updates on the same.

RESTRICTIONS ON DISTRIBUTION AND DISSEMINATION

The distribution or dissemination of this Whitepaper or any part thereof may be prohibited or restricted by the laws, regulatory requirements and rules of any jurisdiction. In the case where any restriction applies, you are to inform yourself about, and to observe, any restrictions which are applicable to your possession of this Whitepaper or such part thereof (as the case may be) at your own expense and without liability to Paycent and/or the Distributor.

Persons to whom a copy of this Whitepaper has been distributed or disseminated, provided access to or who otherwise have the Whitepaper in their possession shall not circulate it to any other persons, reproduce or otherwise distribute this Whitepaper or any information contained herein for any purpose whatsoever nor permit or cause the same to occur.

NO OFFER OF SECURITIES OR REGISTRATION

This Whitepaper does not constitute a prospectus or offer document of any sort and is not intended to constitute an offer of securities or a solicitation for investment in securities in any jurisdiction. No person is bound to enter into any contract or binding legal commitment and no cryptocurrency or other form of payment is to be accepted on the basis of this Whitepaper. Any agreement in relation to any sale and purchase of PYN tokens (as referred to in this Whitepaper) is to be governed by only the TandCs of such agreement and no other document. In the event of any inconsistencies between the TandCs and this Whitepaper, the former shall prevail.

You are not eligible to purchase any PYN tokens in the Paycent Initial Token Sale (as referred to in this Whitepaper) if you are a citizen, resident (tax or otherwise) or green card holder of the United States of America or a citizen or resident of the Republic of Singapore.

No regulatory authority has examined or approved of any of the information set out in this Whitepaper. No such action has been or will be taken under the laws, regulatory requirements or rules of any jurisdiction. The publication, distribution or dissemination of this Whitepaper does not imply that the applicable laws, regulatory requirements or rules have been complied with.
RISKS AND UNCERTAINTIES

Prospective purchasers of PYN tokens (as referred to in this Whitepaper) should carefully consider and evaluate all risks and uncertainties associated with Paycent, the Distributor and their respective businesses and operations, the PAY tokens, the Paycent Initial Token Sale and the Paycent and Paycentos Wallet (each as referred to in the Whitepaper), all information set out in this Whitepaper and the TandCs prior to any purchase of PYN tokens. If any of such risks and uncertainties develops into actual events, the business, financial condition, results of operations and prospects of Paycent and/or the Distributor could be materially and adversely affected. In such cases, you may lose all or part of the value of the PYN tokens.
